## Construction Finance HW

1. Using the Base Case project costs, complete the following table.

Table 1. Construction Interest Cost as a function of Loan Amount and Interest Rate. Note: This table assumes all loans charge 1 point. Two check figures are provided for you.

| Loan Amount | $4 \%$ | $6 \%$ | $8 \%$ |
| ---: | ---: | ---: | ---: |
| $6,000,000$ | 104,855 |  |  |
| $8,000,000$ |  |  |  |
| $10,000,000$ |  |  |  |
| $12,000,000$ |  |  | 554,327 |

2. Plot $\mathbf{2}$ graphs of the cash flows by month for the equity investor and the bank. The graph below is for the base case cash flows. Graph 1 - Use a $6 \%$ interest rate and a 6,000,000 loan with one point. Graph 2 - Use a $6 \%$ interest rate on an 11,000,000 loan with 2 point.

Figure 1. Dollar investment in project by source.

3. Turn in a printout of the Development Budget Tab, the Constr Timing Tab, and the Constr Finance Tab, for an 11,000,000 loan at $6 \%$ with 2 points.
