## Homework \#2 - Brief Solution

1. You are seeking a 30 year ARM loan of $\$ 250,000$ which will charge 2 points. You will also incur $\$ 1500$ in other third party closing costs related to this loan. Assuming you keep this loan for 4 years, what are your CF's, the yield to lender and cost to borrower (expressed as
APR's)? What do you pay each year in interest?
■ Initial rate 2.75\%

- Annual adjustments - Tbill + 2.0\% (rounded to 1/8\%)
- No payment or interest rate caps
- Tbill Index, now at 2.21, then changes annually to: $3.23,6.12,7.76$

Is this loan teased? Explain. Yes. Index plus margin is $2.21+2.0=4.21$, but the start rate is lower at $2.75 \%$ illustrating this loan is teased.

■ Initial rate 3.25\%
■ Annual adjustments - Tbill + 2.25\% (rounded to $1 / 8 \%$ )

- Max change of $2 \%$ per year interest rate
- Max interest of 5\% above initial rate
- Tbill Index, now at 2.21, then changes annually to: 3.23, 6.12, 7.76
